## Needle-Trap

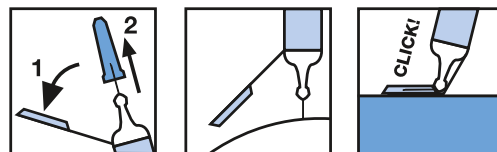

### Unique, Label-integrated Needle Protection

**Needlestick injuries after injections expose healthcare professionals to a high risk of infection. This could frequently be avoided by using modern safety systems. Increasing legal requirements for workplace safety in various countries obligate employers in the healthcare sector to protect their employees against needlestick injuries. Schreiner MediPharm offers a cost-efficient and reliable solution for needle protection.**

Needle-Trap is a unique, label-integrated needle protection system that helps to prevent accidental needlestick injuries. The simple, economical design of its integrated safety mechanism allows the needle to be quickly and safely secured after use. It can be easily incorporated into conventional labeling systems and is adaptable to the most common syringe types. Needle-Trap meets the requirements of both healthcare professionals and the pharmaceutical industry: It combines safety in practice with economy, flexibility and process reliability for the pharmaceutical manufacturer.

#### Needle-Trap. Making safety a snap.
